## Outperformance likely to continue... upgrade to BUY with upwards revised target price to Rs 5,500

BFL continues to remain preferred pick for investors led by strong business growth, safer business model with lowest NPAs in industry and limited investment options in financial space. We believe sharp move in stock price is mainly led by continuous foreign flow in markets specifically in businesses which continues to do well in terms of overall business metrics. Within the financial space, we believe private sector banks and NBFCs qualifies for the said investment purpose. However since investment options to foreign investors are very limited as foreign investment limit in most of the private sector banks is either close to allowable limit or already breached the limit, Bajaj Finance in NBFC space qualifies for both strong company fundamentals and also in terms of scope for further foreign investments.

BFL continues to perform well on overall business metrics with Asset Under Management growth of 57\% CAGR in FY09-14. As a result, AUM has grown 12.1x since FY09 which remains best in the industry. This growth is mainly due to company's presence in segments which continues to remain unaffected by recent slowdown in the economy. Penetration level in Consumer financing specially consumer durables financing, digital product financing and two wheeler financing continue to increase. Also cross selling of other products and SME financing (Mortgage and LAP) remains the other key growth drivers. Further BFL continues its growth trajectory in Q3FY15 as well with AUM growth $37 \%$ yoy to Rs 308 bn led by strong demand for consumer financing in festive season. Growth in SME Financing (which includes Mortgage, Loan against property Small Business Loan and Loan Against securities) for BFL also remains strong at 46\% yoy in Q3FY15.
NIMs (calc) for BFL is best in the industry at $11.2 \%$ in FY14 which has improved marginally to $11.7 \%$ in Q3FY15 due to seasonality of higher disbursements in high yielding consumer segment on back of festive season. Bank Borrowings for BFL has come down significantly $56 \%$ in FY14 to $47 \%$ in Q3FY15 mainly due to cost differentials between bank and market borrowings.
Asset quality of BFL also remains strong and best in the industry at Gross NPA of $1.5 \%$ and Net NPA of $0.49 \%$. Further there is no impact on BFL on back of change in regulations by RBI of higher standard asset provisioning and early recognition of NPAs. BFL already follows substantially stringent policy on provisioning which was higher than RBI norms applicable for NBFCs. BFL continues to provide $0.4 \%$ on all standard assets as against earlier regulatory requirement of $0.25 \%$ and inline with current regulatory requirement of $0.4 \%$. BFL recognize NPAs on 90 days overdue as against earlier regulatory requirement of 180 days and current requirement of 90 days. On capital adequacy front as well, BFL remains best with CAR of $18.7 \%$ and Tier I capital of $14.7 \%$ in Q3FY15.

## Valuation

BFL continues to remain preferred pick for investors led by strong business growth, safer business model with lowest NPAs in industry and limited investment options in financial space. We believe BFL deserves premium valuation compared to other NBFCs and private sector banks due to reasons stated above and better return profile with ROE / ROA of $21 \%$ / $3 \%$ for FY17E. We have built in $25 \%$ AUM CAGR FY15-17E leading to 23-25\% growth in Net interest income and Net profit. At CMP of Rs 4,323 , the stock is trading at P/ABV of $3.7 x$ and $3.2 x$ for FY16E and FY17E respectively. We upgrade BFL to buy from hold with upwards revised target price of Rs 5,500, 4x FY17E ABV.

Company Updates (contd...)
(We have initiated BUY on BFL on $24^{\text {th }}$ April 2012 at Rs 847 with target price of Rs 1,040 and initiated coverage on 12th July 2013 with strong BUY rating on the stock at Rs 939 with target price of Rs 1,125. Further we have upgraded the target price continuously to Rs 3418 on $15^{\text {th }}$ January 2015. All our earlier targets on BFL was achieved yielding returns of $410 \%$ (based on yesterday's closing price) since $24^{\text {th }} \mathrm{April}$ 2012).
